About me

I am Chidera Prince Eze, a passionate web developer with experience in building responsive, user-friendly, and performance-focused websites. I specialize in turning ideas and designs into functional web solutions using modern technologies. I pay close attention to detail, write clean and maintainable code, and enjoy solving problems that improve user experience. I am committed to continuous learning and delivering high-quality results that meet both client and business goals.

Experience

Production Support Assistant

Odaka and Sons Oil Mill

April 2019 – 2025

- Supported daily production operations to ensure smooth and efficient workflow
- Assisted in monitoring production processes and maintaining quality standards
- Worked with team members to meet daily production targets

Data Assistant

Data Solutions Ltd, Lagos, Nigeria

June 2022 – Present

- Collected, validated, and maintained large datasets to ensure accuracy and completeness.
- Assisted in data entry, data cleaning, and database management using Excel, SQL, and Google Sheets.
- Generated weekly and monthly reports to support departmental decision-making.

Web Developer

2023 – Present

Freelance / Self-Employed

- Designed and developed responsive websites using HTML, CSS, JavaScript, and modern frameworks
- Converted UI/UX designs into functional, user-friendly web pages
- Optimized website performance, SEO, and cross-browser compatibility
- Worked closely with clients to understand requirements and deliver tailored web solutions
- Maintained and updated existing websites to improve functionality and security
